Powering Experience-Driven Businesses

Luxor's KwikBoost® mobile device charging solutions help companies improve employee and customer experiences. Whether in the reception area, break room, or a collaborative workspace, KwikBoost products elevate employee engagement and deliver customer experiences that make companies stand out from the competition. Here's how:

Conference Rooms and Collaborative Workspaces

Employees spend significant time in conference rooms and other collaborative workspaces, tackling business problems or projects. Our Mini Charging Hubs in these spaces are not just charging solutions, they are tools to keep people powered up and productive.

Lobby and Reception Areas

Whether you manage a hotel, retailer, repair shop, or salon, you likely have high-traffic area where visitors and customers spend extended periods of time. By providing our Floor Stand and Wall-Mounted Charging Stations as an amenity, you are not just improving the customer experience, you are also showing them that their needs are a priority, thereby increasing brand loyalty.

Lunch Areas and Break Rooms

You want to provide relaxing spaces where employees can take a mental and physical break from their jobs. KwikBoost's Floor-Stand Charging Stations, Mini Charging Hubs, and Charging Lockers replenish the batteries of employee devices (both personal devices and one-the-job devices such as mPOS systems), helping to demonstrate that you care about their personal needs while at work.

15%

average annual revenue growth rate of 'Experience-Driven Businesses' vs. other companies.
